

### 1 真分数か仮分数か

$$(1) \frac{3}{4} \rightarrow \text{真分数} \quad (3 < 4)$$

$$(2) \frac{5}{3} \rightarrow \text{仮分数} \quad (5 > 3)$$

$$(3) \frac{7}{7} \rightarrow \text{仮分数} \quad (7 = 7)$$

$$(4) \frac{2}{9} \rightarrow \text{真分数} \quad (2 < 9)$$

### 2 仮分数を帯分数に直す

$$(1) \frac{5}{3} = 1\frac{2}{3} \quad (5 \div 3 = 1 \text{ あまり } 2)$$

$$(2) \frac{7}{4} = 1\frac{3}{4} \quad (7 \div 4 = 1 \text{ あまり } 3)$$

### 3 計算

$$(1) \frac{2}{5} + \frac{1}{5} = \frac{3}{5}$$

$$(2) \frac{4}{7} - \frac{2}{7} = \frac{2}{7}$$
