

1 仮分数を帯分数に直す

- (1) $\frac{9}{4} = 2\frac{1}{4}$ ($9 \div 4 = 2$ あまり 1)
 (2) $\frac{11}{3} = 3\frac{2}{3}$ ($11 \div 3 = 3$ あまり 2)
 (3) $\frac{13}{5} = 2\frac{3}{5}$ ($13 \div 5 = 2$ あまり 3)
 (4) $\frac{10}{7} = 1\frac{3}{7}$ ($10 \div 7 = 1$ あまり 3)

2 帯分数を仮分数に直す

- (1) $2\frac{1}{3} = \frac{7}{3}$ ($2 \times 3 + 1 = 7$)
 (2) $3\frac{2}{5} = \frac{17}{5}$ ($3 \times 5 + 2 = 17$)
 (3) $1\frac{5}{6} = \frac{11}{6}$ ($1 \times 6 + 5 = 11$)
 (4) $4\frac{3}{4} = \frac{19}{4}$ ($4 \times 4 + 3 = 19$)

3 計算

- (1) $\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$
 (2) $\frac{5}{6} - \frac{1}{6} = \frac{4}{6} (= \frac{2}{3})$
 (3) $\frac{5}{9} + \frac{7}{9} = \frac{12}{9} = 1\frac{3}{9} (= 1\frac{1}{3})$
 (4) $1\frac{2}{5} + \frac{2}{5} = 1\frac{4}{5}$
